- ▶ Available 8x DVD-Rom, 24x CD-RW Or 8x/24x DVD/CD-RW Optical Drive Modules
- ▶ Available Second Hard Drive Modules
- ▶ External Removable Devices Allow For Increased Portability When Not Attached

D/Bay devices are external plug & play solutions that expand the capabilities of EVAS' Dell D-Series of notebook computers. The D600 and D800 notebooks both come standard with a floppy drive and CD-ROM. There is a single module bay internally in each computer, which holds one of the drives. If you have a need for multiple drives, choose an optional D/Bay device such as a second hard drive or optical drive. Each drive module comes with a non-removable D/Bay connector cable that connects to the notebook. The cable wraps securely around the device when in storage. The D800 has a built in D/Bay port, where as the D600 requires the D/Port or D/Dock for connection.
